Contact details for queries

Please email us at CORC@annafreud.org if you have any questions or comments about this data set specification.

What is the CORC+ data set specification?

The CORC+ data set specification defines the content and format of the data set *submitted* to CORC annually by services following the CORC+ approach.[1] It does not intend to specify all of the data that services should *collect* locally. However, it does serve as a guide to the data we think are useful to collect for routinely monitoring service user outcomes.

What data files must be included in a data submission for CORC+?

Three data files must be included in the data set for every submission:
- DEM (service user demographic data)
- POC (data on service users' periods of contact)
- EVENT (data on events within periods of contact e.g. sessions, questionnaire completions)

At least one questionnaire data file should be included in a data submission. The reason this document has so many pages is because of the number of different questionnaires. You can ignore the pages for the questionnaire data files you are not submitting!

What are the relationships between the data files?

CORC+ data have a hierarchical structure as illustrated by the following diagram:
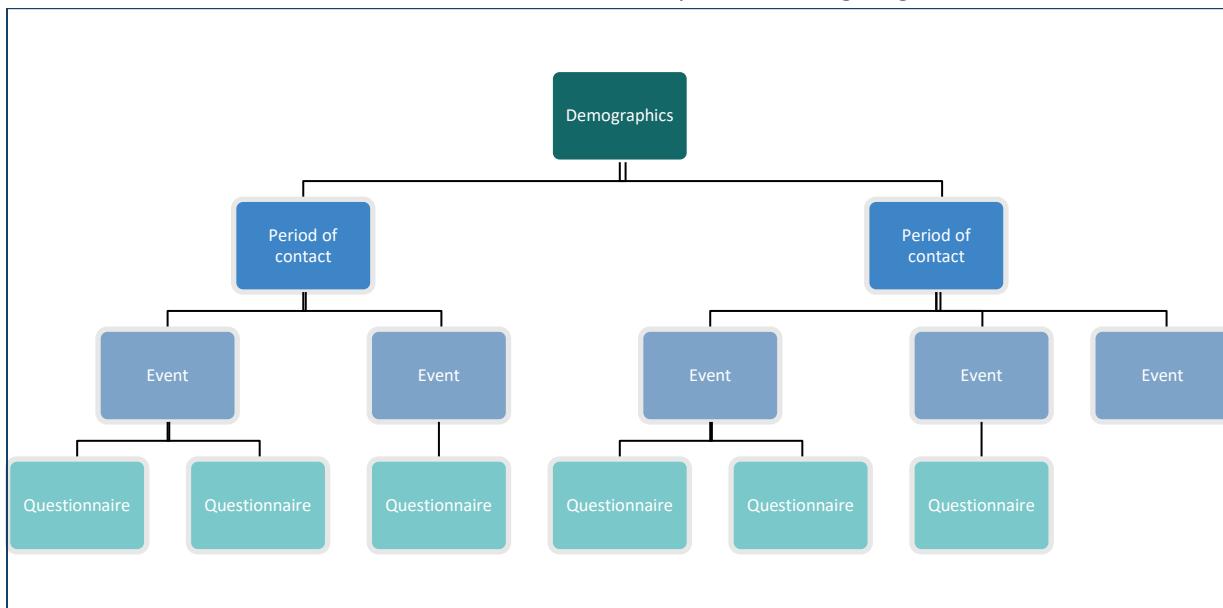

The means that the following relationships apply:
- Each questionnaire record submitted in a QUES file type must also be submitted with an entry in an associated Event (EVENT) file, period of contact file (POC), and Demographic (DEM) file.

---

[1] A data set is a collection of observations or measurements about the children and young people seen by your service. In the case of the CORC+ data set specification, the data are arranged into multiple tables of data, saved as Comma Separated Values (CSV) files.

- Each Event record submitted in an EVENT file type must be submitted with an entry in an associated period of contact file (POC), and Demographic (DEM) file.
- Each Period of Contact record submitted in a POC file type must be submitted with an entry in an associated Demographic (DEM) file.
- Each Demographic (DEM) record submitted will not have an associated parent as it is at the top of the file hierarchy.

Please ensure files do not contain any personally identifiable information

Files prepared according to this data set specification should not contain any personally identifiable information. The CORC+ dataset is a deidentified dataset which means direct identifier fields such as name, date of birth, address and NHS number are not included in the specification. Please ensure submitted files do not contain these fields.

Please check the SERVICE_ALLOCATED_PATIENT_ID field and remove any personally identifiable information. We ask that SERVICE_ALLOCATED_PATIENT_IDs do not contain or are not derived from any direct identifiers e.g. name, DOB, NHS number.

Required file format: Comma separated values (CSV)

Comma delimited files are the required file format for delivery.

CSV files should have the following attributes:

- CSV Files should use a windows-style line termination (CR+LF)
- CSV Files should quote strings also containing commas, e.g.,
    "this, is an acceptable string"
    this, is not
- CSV Files should use a date format of "yyyy-mm-dd".
- CSV Files should have a header row containing field names (see definitions).
- CSV Files should be encoded as UTF-8.

CSV file definitions

This section sets out the fields that must be included in each CSV file. **All fields specified must be included in the CSV files being submitted, even if they don't contain any data.** Those fields marked 'mandatory to submit' must contain data in every row.

Please see the 'Variable definitions' spreadsheet for further details including the definitions of the fields and permitted values.

Field types

Type	Description	Range	Example
String	A collection of numbers and letters.		This is a string
Integer	A whole number	-2^31 to 2^31-1	42
Decimal	Number to two decimal places		4.02
Date	Date in the format yyyy-mm-dd		2012-01-31
Time	Time in the format HH:MM		10:30

Demographic file (MUST BE SUBMITTED)

The Demographic file contains the service user-level data records. This file has no "Parent" file. There must only be one Demographic File submitted per Data Submission File Set.

Filename convention

File names will take the form: **DEM_[service_ID]_[yyyymmdd].csv** where:

[service_ID] is the service identifier of the originating service. If you are unsure what your service identifier is, please get in touch with the CORC team.
[yyyymmdd] is the date the file was created in the form year, month, date. E.g. 20120131 (31st January 2012)

Mandatory fields are indicated with a "Y". If data in any mandatory fields is missing, then the entire file will be rejected.

Data submitted in Fields marked Updatable "N" will *not* be updated following subsequent submissions of changed data. In other words, the first submitted value will be retained for these fields.

Please refer to the 'Variable definitions' spreadsheet for detail of valid values and value descriptions.

Demographic file field definitions

Field	Type	Size	Mandatory to submit	Updateable
SERVICE_ALLOCATED_PATIENT_ID	String	50	Y	N
SERVICE_ID	Integer	3	Y	N
GENDER	Integer		Y	N
ETHNICITY	String	3		

Period of contact file (MUST BE SUBMITTED)

The Period of Contact file contains Period of Contact data for each service user. One service user may have multiple Periods of Contact. This file must be submitted with a corresponding Demographic file containing a related service user record for each Period of Contact record. There should only be one Period of Contact File submitted per Data Submission File Set.

Filename convention

File names will take the form: **POC_[service_ID]_[yyyymmdd].csv** where:

[service_ID] is the service identifier of the originating service. If you are unsure what your service identifier is, please get in touch with the CORC team.
[yyyymmdd] is the date the file was created in the form year, month, date. E.g. 20120131 (31st January 2012)

Mandatory fields are indicated with a "Y". If data in any mandatory fields is missing, then the entire file will be rejected.

Data submitted in Fields marked Updatable "N" will *not* be updated following subsequent submissions of changed data. In other words, the first submitted value will be retained for these fields.

Please refer to the 'Variable definitions' spreadsheet for detail of valid values and value descriptions.

Period of contact file field definitions

Event file (MUST BE SUBMITTED)

The Event File contains individual contact (event) data for each service user Period of Contact. One service user may have multiple Events within a Period of Contact. This file must be submitted with a corresponding Period of Contact file containing a related Period of Contact record. There should only be one Event File submitted per Data Submission File Set.

Filename convention

File names will take the form: **EVENT_[service_ID]_[yyyymmdd].csv** where:

[service_ID] is the service identifier of the originating service. If you are unsure what your service identifier is, please get in touch with the CORC team.
[yyyymmdd] is the date the file was created in the form year, month, date. E.g. 20110131 (31st January 2011)

Mandatory fields are indicated with a "Y". If data in any mandatory fields is missing, then the entire file will be rejected.

Data submitted in Fields marked Updatable "N" will *not* be updated following subsequent submissions of changed data. In other words, the first submitted value will be retained for these fields.

Please refer to the 'Variable definitions' spreadsheet for detail of valid values and value descriptions.

Individual questionnaire files (AT LEAST ONE SHOULD BE SUBMITTED)

Each Individual Questionnaire File must be submitted with a corresponding Event file containing a related Event record. One service user may have multiple Questionnaire Files within an Event. There should only be one Individual Questionnaire File submitted per Questionnaire Type in a Data Submission File Set.

Filename convention

File names will take the form: **QUES_[code]_[service_ID]_[yyyymmdd].csv** where:

[code] is the code allocated to the given questionnaire type (see table below).
[service_ID] is the service identifier of the originating service. If you are unsure what your service identifier is, please get in touch with the CORC team.
[yyyymmdd] is the date the file was created in the form year, month, date. E.g. 20120131 (31st January 2012)

Appendix 1: Licences

Under copyright, the developer of an original measure/questionnaire has exclusive rights for certain activities. These can include producing copies and adapting the measure/questionnaire, e.g. to incorporate into an electronic care record system. Services and care record system suppliers should ensure that they have checked the requirements for using a particular measure/questionnaire and have a suitable licence or permission in place.

For services involved in the delivery or improvement of health or social care in England, information on obtaining licences for integrating measures/questionnaires into electronic systems and their terms of use is coordinated by the Health and Social Care Information Centre (HSCIC). This information can be found at http://systems.hscic.gov.uk/clinrecords/nccr

Appendix 2: Release log

The tables below provide a history of changes to the data set specification in reverse chronological order.

Version	Date	Type of change	Field(s)/variable(s)	Data file(s) affected	Details
v5.5	30/09/19	Amended Variable Type	PERIOD_OF_CONTACT _START	POC	Amended variable type from 'String; size 50' to 'Date' with size left blank.
v5.4	01/02/2019	Moved	COMM_CODE	POC	Moved COMM_CODE to the last column in the POC file due to it being incorrectly stated in previous versions.
v5.3	29/06/2017	Added	SRS variables	SRS	Added SRS questionnaire file field definitions page as it had been removed accidentally in a previous version
v5.3	29/06/2017	Removed	ESQ_13, ESQ_14, ESQ_15, SCORE_DESCRIBE_FAM, SCORE_MAIN_PROBLEM	ESQ, SCORE15	Removed as CORC no longer collecting free text responses
v5.3	29/06/2017	Added	COMM_CODE	POC	Added "Organisational code of Clinical Commisioning Group (CCG)" so members can differentiate between service users who are seen under different CCGs
v5.2	04/10/2016	Removed	GOALS_DESCRIPTION_1 GOALS_DESCRIPTION _2 GOALS_DESCRIPTION _3	POC	CORC is not accepting Goal description any longer so the fields have been removed.
v5.1	14/07/2016	Made mandatory	QUESTIONNAIRE_VERSION COMPLETED_BY	CGAS, CORE10, CORS, CSRS, CURRVIEW,ESQ, GAD, HON, IES, MAMSC, OCD,ODDP, PHQ, RCADS, RGAD, RMQ, SA, SCORE15, SDQFUP, SFQ, SP	In some of the questionnaires questionnaire version and completed by are necessary for analysis, hence they have been made mandatory
v5.0	21/12/2015	Removed	NHS_ID	DEM; POC; EVENT; **all** QUES files	Removal of personally identifiable data
		Made mandatory	SERVICE_ALLOCATED_PATIENT_ID	DEM; POC; EVENT; all QUES files	NHS_ID has been removed, so SERVICE_ALLOCATED_PATIENT_ID is now mandatory
		Amended variable label	SERVICE_ALLOCATED_PATIENT_ID	DEM; POC; EVENT; **all** QUES files	Amended variable label as follows: *Old wording:* Assumed to be unique at local level but not across global dataset *New wording:* Assumed to be unique within a service but not across all services submitting data to the CORC+ data set
		Amended variable type	SERVICE_ID	DEM; POC; EVENT; **all** QUES files	Amended variable type from 'String; size 50' to 'Integer; size 3'
		Removed	DOB	DEM	Removal of personally identifiable data
		Removed	POSTCODE	POC	Removal of personally identifiable data
		Added	AGE_AT_POC_START_DATE	POC	Date of birth has been removed, which was previously used to derive age at period of contact start date. Age at period of contact start date should therefore now be included in the submission
		Removed	GP_PRACTICE_CODE	POC	Removal of data with a low risk of potentially contributing to personal identification of service users
		Removed	GP_PRACTICE_POSTCODE	POC	Removal of data with a low risk of potentially contributing to personal identification of service users
		Removed	CONSENT_OBTAINED	POC	Personally identifiable data no longer submitted, so consent to submit personally identifiable data no longer required
		Removed	CONSENT_OBTAINED_FOR_SECONDARY_USES	POC	Previously deprecated variable (superseded by CONSENT_OBTAINED)
		Added	NEEDS_BASED_GROUPING	POC	Included to support testing of the CAMHS need-

				based on groupings to inform payment systems
